HOW TO SUBMIT PHOTOS ONLINE

1. PREPARE YOUR PHOTOS:

Save COPIES of your images as JPEGs no smaller than 500KB and no larger than 3MB in Adobe 98 RGB (or sRGB) mode (not CMYK) at 1,000 to 3,000 pixels on the longest side. Name each photo this way with underscores instead of spaces: FirstnameLastname_Species.jpg (Example: [JohnDoe_Yosemite.jpg](#))

For wildlife or plants, short species name and for land or seascape, use short location. If there are multiple images, name this way: [Yosemite1](#), [Yosemite2](#), [Yosemite3](#). The “Subject” you will type into your entry caption can be a longer name of species or location.

NOTE: Photographers with images that pass to the second round of judging will be asked to send your high-resolution files and RAW (original) files. All who move to next round will need to send caption / camera information before final judging. Instructions will be emailed.

2. LOG IN OR START A NEW CONTEST USER ACCOUNT: Fill in (or update) your current contact information, user name, and create a password to enter photos and manage your entries.

Do you have an NBP user account? [Log in](#) or Start a new account: [Sign up](#)

ETHICAL RULES

Every photographer is urged to practice responsible, safe, and ethical nature photography.

Please adhere to the following guidelines.

NOTE: Violations will result in disqualification.

- In national parks, entrants must observe all stated rules and regulations, such as photographing only from the vehicle, night drives taken only with permission, etc. Keep on marked roads and tracks unless driving off-road is allowed.
- Nesting and denning animals must not be photographed with a wide-angle or macro lens. Stay at a safe distance and work from a blind if possible.
- Animals must not be lured with bait, including live animals, dead animals or parts of animals, processed meat, other human or pet food, or decoys, such as fake mice. Setting a camera trap around a fresh kill or cache is generally acceptable, as long as it is naturally occurring.
- Nocturnal wildlife must not be photographed with a white flash at night. Cameras that use flash with filters only letting through infrared light, such as some camera traps, are permissible.
- Drones that depict birds or other animals fleeing, or animals displaying defensive behavior related to the photographer's presence are not permitted. Drones must be at a safe distance from living subject(s). Carefully review and follow local drone regulations and obtain necessary permits.
- Images in which animals appear stressed, harassed, or crowded by the photographer or camera, will be disqualified.
- Images must be of NON-CAPTIVE species in natural, wild situations, not staged in any way. No pets, falconry birds, game farm, or for-hire animals permitted.

Game reserves should comply with ethical wildlife guidelines (no wildlife baiting, etc.).

NOTE: For categories with conservation and research topics, a controlled setting may be permitted with full disclosure of your project in your contest entry form caption.

- Entrants must not infringe upon the rights of any other photographer or person and must seek the necessary permissions from human subjects.
- AI-GENERATED images or films are not eligible; this includes adding new image content to photos by AI algorithms.

Our objective has always been to accurately depict the true natural history scene as it was viewed through the camera lens in the field.
